---

## CARRER OBJECTIVE

"Passionate about building software solutions, I aim to join a dynamic team as a Software Developer where I can apply my skills in full-stack development, REST APIs, and object-oriented programming while continuing to grow in a collaborative and agile environment.

---

## EDUCATION

INDUS UNIVERSITY | 2022 - 2025

IT & CA

During my Bachelor's degree at Indus University, I developed a solid foundation in software development, programming languages like C and Java, and core computer science concepts such as data structures, algorithms, and database management. I actively participated in lab sessions, coding assignments, and technical seminars which enhanced my problem-solving and debugging skills. My academic experience also involved collaborative projects, where I learned the importance of teamwork, version control (Git), and clean coding practices. This hands-on exposure has prepared me to contribute effectively in a real-world software development environment.

## SKILLS

### Programming Language

- C, C++, Python

### Databases

- Mysql

### Web Servers

- Apache

### Softwares

- GIT, GITHUB

### Systems

- Window

## Soft - Skills

- Problem-Solving
  - Logical Thinking
  - Adaptability
  - Eagerness to Learn
  - Attention to Detail
-
